Traffic Light Analysis - Intersection of St. Georges Ave., Route 27, & Route 35

Rahway, NJ - February 16, 2024 – The City of Rahway has enlisted the New Jersey Department of Transportation (DOT) Engineering Division to investigate the timing cycles for the traffic lights at the intersection of St. Georges Ave., Route 27, and Route 35. An initial analysis determined that all timers and detections are working properly. A DOT Engineer has been assigned to this location to analyze traffic patterns and determine if the timers need to be adjusted according to the flow of traffic in this area throughout the day.
